TIANQI XIONG

Interaction Designer specializing in interactive systems and experience prototyping. Works at the intersection of technology and design to explore how subtle interactions can improve usability and engagement in real-world contexts.

WORK EXPERIENCE

Epiroc *2026 - present*

Thesis Worker

- Explore how interaction design can soften the relationship between humans and automated mining systems;
- Design for human-in-the-loop situation;

BMW Group *2025 - 2026*

HMI Design Intern

- Design & Prototype in-car central display interfaces;
- Conduct competitive benchmarking;
- Lead conceptual explorations of future scenarios;

Volvo Cars *2025*

UX Design Intern

- Design & refine DIM to ensure clarity and seamless information delivery;
- Conduct internal & external usability test;
- Optimize interaction logic and information hierarchy;

Cyclone Robotics *2022 - 2023*

UX Design Intern

- Design core products' interfaces, responsible for process from strategy to execution;
- Assist in usability test and information architecture;

HOTO Tools *2022*

Industrial Design Intern

- Conduct benchmarking, create persona and user scenarios;
- Create design and exhibition concepts;

Fablab O *2021*

Teaching Assistant

- Lead stool structure course and physical prototyping;
- Guide students in structural design, iterative prototyping, and feasibility refinement.

EDUCATION

Umeå Institute of Design *2023 - 2026*

MFA Interaction Design

Tongji University *2019 - 2023*

B.Eng. Industrial Design

- Freshman scholarship;
- College third class scholarship;
- GPA 89.7/100;

AWARDS & EXHIBITS

Core 77 Design Awards	*Student Runner Up*
UN International Student Conference	*First Prize*
British Ecology Design	*Silver Award*
D&I GAC In-Curation Camp	*First Prize*
Shanghai Think Youth Competition	*First Prize*

Waag Future Lab	*2025*
Dutch Design Week	*2024*
World's Design Capital Conference	*2022*
Surrounding Tongji Design Week	*2021*
Yuz Art Museum	*2021*

SKILLS

- User Experience
- Experience prototyping
- Interactive New Media

Figma, Vibe Coding, P5, Arduino, Laser cutting, 3D printing, Creative Cloud, Rhino, Cinema4D, Spline;
